

ZINKWORKS

Brief 2 Learner Record – Work Placement

INTRODUCTION TO ZINKWORKS

**Name of
Employer:**
Zinkworks

Dates:17th– 21st
February 2025

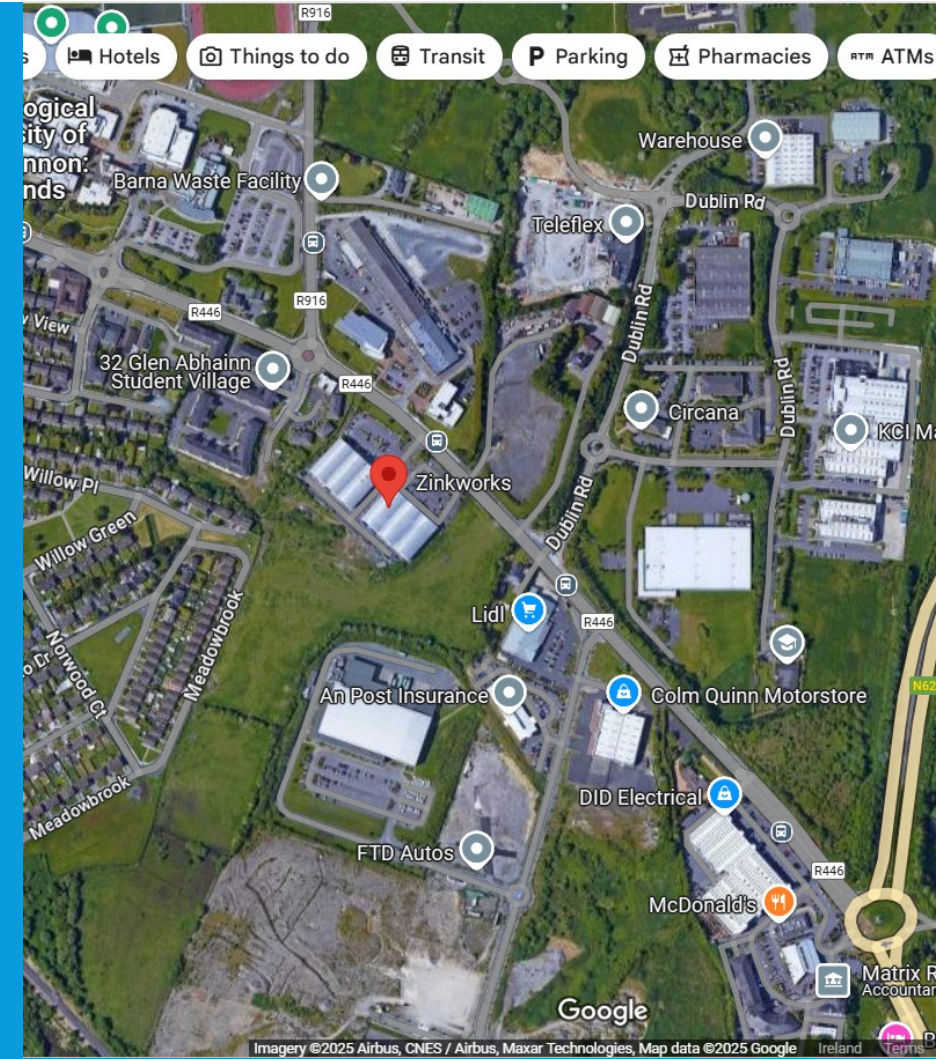

**Hours
Worked:**40hours.

**Supervisor
Name:** David
Caulfield

OVERVIEW OF THE BUSINESS

- **Location:** Shannon Retail Park, Dublin Rd, Kilmacuagh (Mechum), Athlone, Co. Westmeath, N37 E2P6.
- **Overview:** Zinkworks is a great ally to Financial Services and Telecommunications all over the world, they aid people in developing software, utilizing the power of AI-driven Automation and shifting mission-critical systems into the cloud. Also, they employ more than 200 engineers, and it is considered as an international, privately held company.

DUTIES ON WORK EXPERIENCE

- I was solving different bash codes in HackerRank with my colleagues in a daily basis for about 2 hours all over the weekend and for the rest of the day I participated with my teammates in designing a user case project in java.

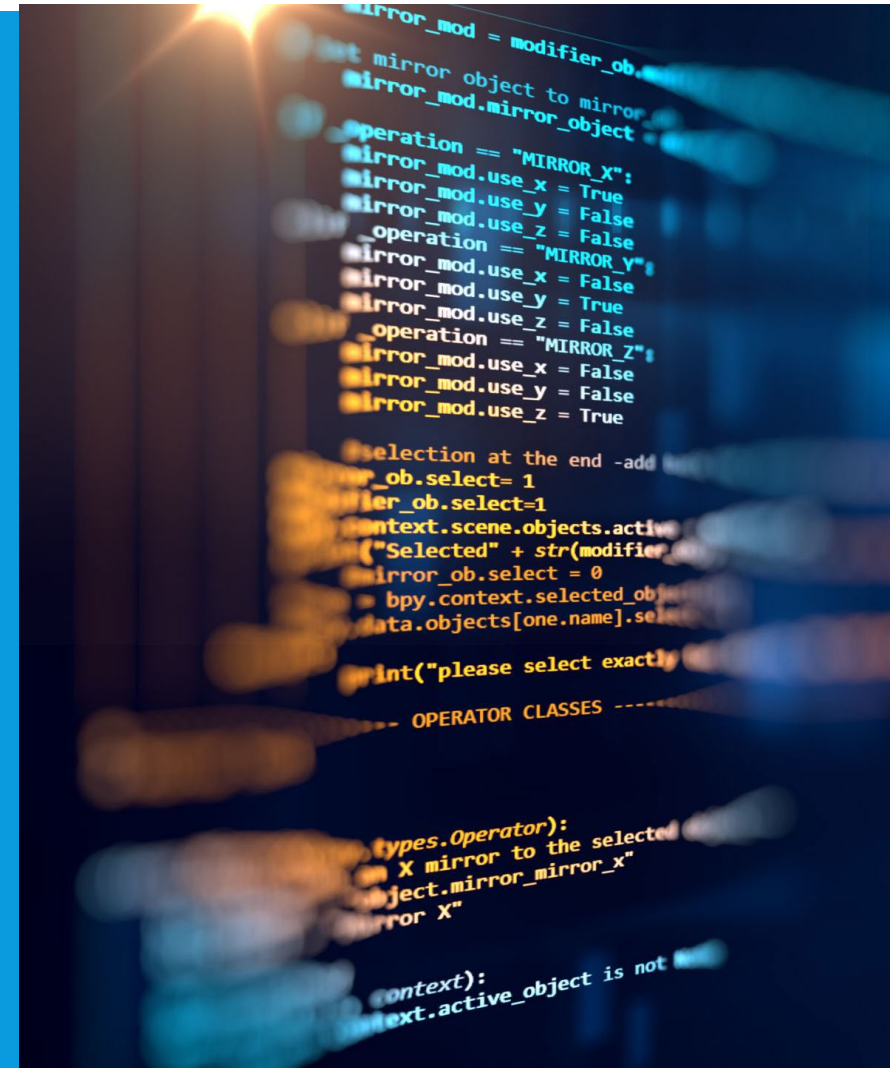

DUTIES ON WORK EXPERIENCE

- Moreover, I involved in a general meeting on Friday at the end of our projects which included a power point explanation of the use case project with the supervisor which he then went on to discuss different terms in Software Development and what terms should we focus on in the next weeks.

LEARNING GAINED

- Skills developed include: I had some Web Development skills in contrasting the colours with the text on a webpage which I used it perfectly. For example, I was helping in designing a service that can take an input URL and return a shortened version of it, I was responsible for the front end of the webpage which I used a white background with a white box and a black text so the user can see what he enters easily.

LEARNING GAINED

- New skills developed: As a result of writing and testing multiple codes in bash using HackerRank, I was able to figure out how to write the codes perfectly without errors with the help of my teammates which they ensured that the codes have no syntax or semantic errors.

IMPACT ON FUTURE CAREER PLANS

- This workplacement has made my choices clear about continuing to work as a Senior .Net Full-stack Developer in the future as I learned a lot about how to make a URL shortener project using different codes in java and I have been taught about coding using bash and how to execute them perfectly in HackerRank which all gave me the confidence to embark on a new journey with my first career selection.
