

Graphic Design and Illustration using Illustrator CC

Portfolio Exercise Book Assignment

Student Name: _____

CENIT
COLLEGE

Graphic Design and Illustration using Illustrator CC

The objective of this Portfolio Exercise Book is to allow you to experiment with Illustrator CC and reinforce what you have learned during the course. You are getting access to the Briefs for your Portfolio Projects at the beginning of the course, but you will be asked to upload the collection of your work only at the end of the course 5 sessions. This is to allow different students at different levels to start doing the Portfolio exercises when they feel more comfortable to do so.

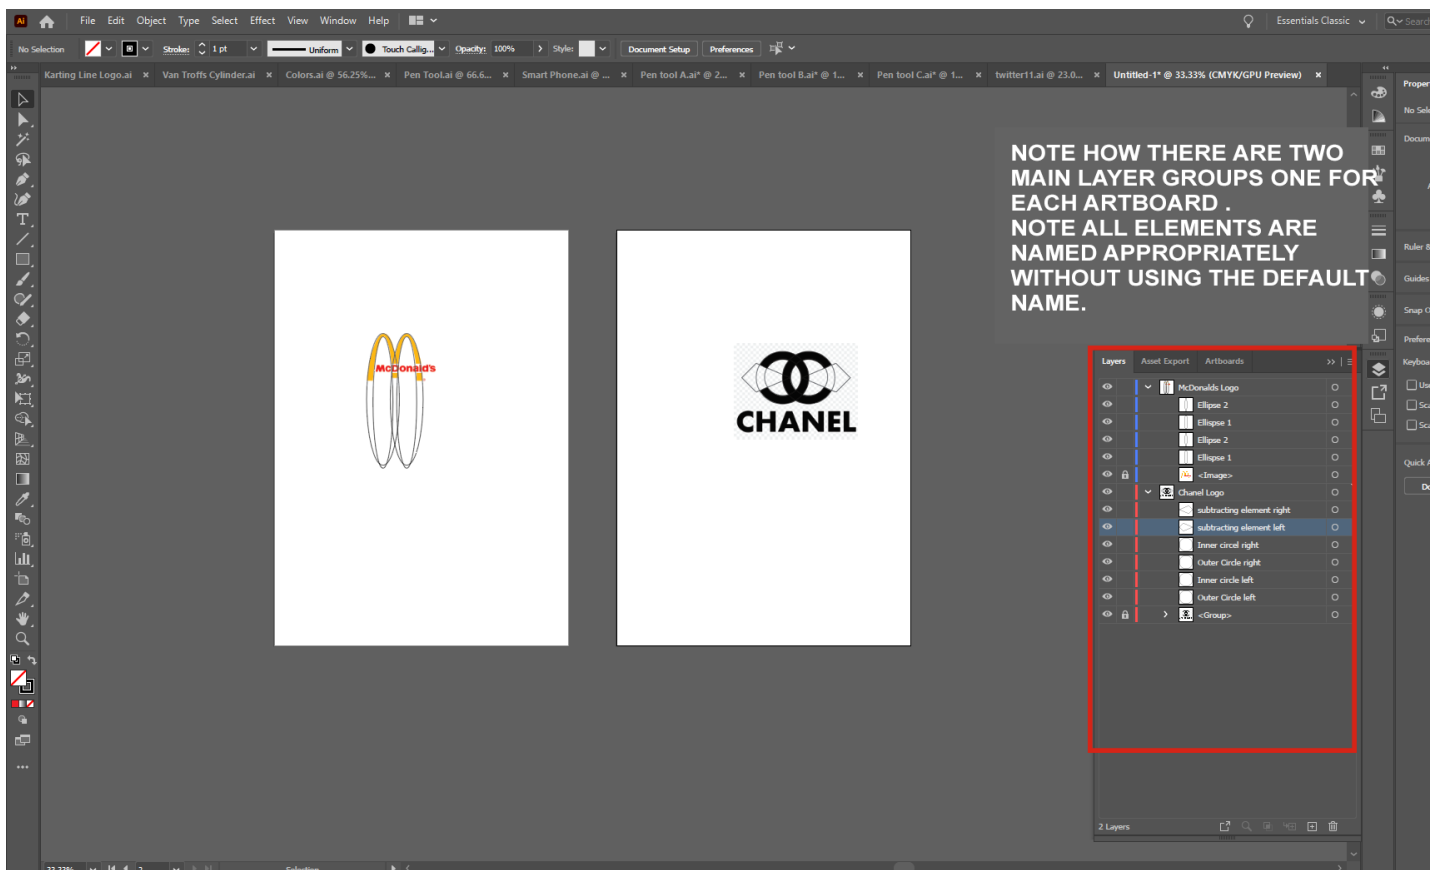

Each portfolio project will differ so please take careful note of the Design Brief for each one and follow it. Also, please ensure that your projects are suitable for this educational course, i.e. no extreme violence, nudity, etc.

When you finish the course you will end up with not just the skills in Graphic design and Illustration using Adobe Illustrator CC, but you will also have pieces of work, created by yourself which can be added to your portfolio and used in job applications.

What to do?

Below you will find the 6 different Portfolios you are asked to complete. Please follow the instructions in each Brief and upload the requested images in the space assigned in each Portfolio.

For each Project you will have upload the final Image (jpeg or png format) and the screenshot of the Project in Illustrator including the layer panel (as shown below).

It is important that you use multiple layers and groups in your Projects, it is also fundamental that you name your layers and group them appropriately with a meaningful name related to what they are. Look at the example above. It is important that we see the layers and groups, please don't flatten or consolidate the layers.

To learn a bit more about Layers and the importance of it, please [click here](#).

Please Contact your tutor if you need any help or you have questions on the assignment.

Graphic Design and Illustration using Illustrator CC

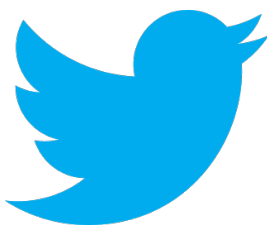

PORTFOLIO PROJECT 1 – Redraw a logo using Shapes

BRIEF

You are tasked with redrawing two of the below famous logos. This project will test your ability of using text, shapes and the tools in the Pathfinder panel. You will also get more accustomed to using Artboards and layers.

Task – Please ensure all tasks are complete, missing tasks will result in your submission being rejected.	Evidence
• Redraw 2 of the below logos using Shapes and the pathfinder panel • Use 2 different artboards, one per logo • Name layers using simple descriptive terms • Group similar layers together when appropriate • Export the illustrator file in either .png or .jpeg	Final exported Image (.png or .jpg) . and 2 Screenshots of Illustrator that shows Layer Panel before using pathfinder and after

LOGOS

TIPS

- Name the artboard with the name of the logo chosen
- For suggestion on how to draw logo using shapes, use Google to research methods
- If you are unsure of anything else or have questions, please contact your eTutor.

PORTFOLIO PROJECT 2 – Redraw a logo using Pen Tool

BRIEF

You are tasked with redrawing two of the logos below. This project will test your ability of using text, pen tool and other tools that you have learned in the course to achieve the final design. You will also get more accustomed to using Artboards and layers.

Task – Please ensure all tasks are complete, missing tasks will result in your submission being rejected.	Evidence
• Redraw 2 of the below logos using pen tool • Use 2 different artboards, one per logo • Name layers using simple descriptive terms • Group similar layers together when appropriate • Export the illustrator file in either .png or .jpeg	Final exported Image (.png or .jpg) and Screenshot of Illustrator that shows Layer Panel

LOGOS

TIPS

- Name the artboard with the name of the logo chosen
- You can use Shapes for secondary elements.
- For suggestion on how to draw logo using pen tool, use Google to research methods
- If you are unsure of anything else or have questions, please contact your eTutor.

PORTFOLIO PROJECT 3 – Icon

BRIEF

You are tasked with designing an icon of your choice. This project will test your ability of using all the tools you learned in Illustrator CC using your original design.

Task – Please ensure all tasks are complete, missing tasks will result in your submission being rejected.	Evidence
Design an Icon as described in the brief above and following the points below: • Use pen tool, shapes and brushes to draw the icon, do not use Image trace. • You can colour your icon with your preferred method • Name layers using simple descriptive terms • Group similar layers together when appropriate • Export the illustrator file as .png or .jpeg	Final exported Image (.png or .jpg) and Screenshot of Illustrator that shows Layer Panel

TIPS

- Look at this article for tips on how to design a better icon:
<https://www.smashingmagazine.com/2016/05/easy-steps-to-better-logo-design/>
- Before starting the project research existing icons to take inspiration from.
- Use multiple artboards if you have multiple version of your Icon.
- When using multiple Artboards, arrange you layers so that each Main layer is associated with the appropriate artboard.
- If you are unsure of anything else or have questions, please contact your eTutor.
