

Visual Design using Photoshop CC

Portfolio Exercise Book Assignment

Student Name: _____

CENIT
COLLEGE

eCollege
skills online

The objective of this Portfolio Exercises Book is to allow you to experiment with Photoshop CC and reinforce what you have learned during the course. You are getting access to the Briefs for your Portfolio Projects at the beginning of the course, but you will be asked to upload the collection of your work only at the end of the course 5 sessions. This is to allow different students at different levels to start doing the Portfolio exercises when they feel more comfortable to do so.

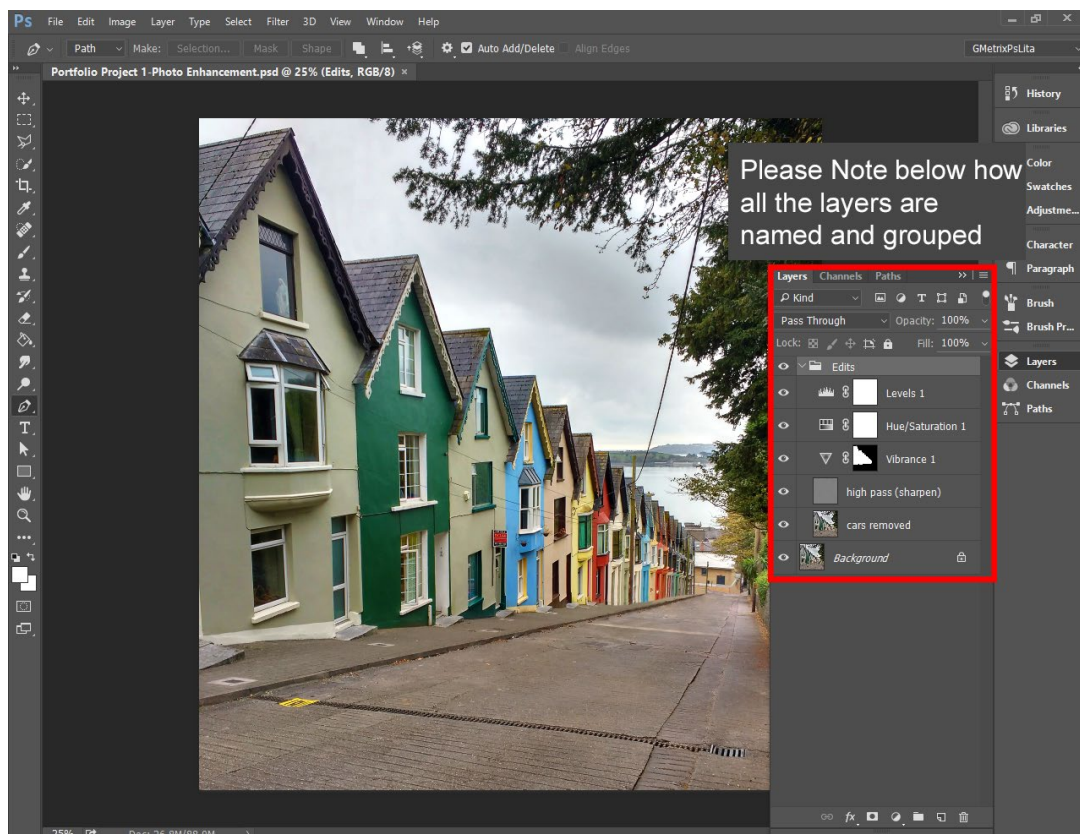

Each portfolio project will differ so please take careful note of the Design Brief for each one and follow it. Also, please ensure that your projects are suitable for this educational course, i.e. no extreme violence, nudity, etc.

When you finish the course you will end up with not just the skills in Visual Communication with Adobe Photoshop but you will also have a pieces of work, created by yourself which can be added to your portfolio and used in job applications.

What to do?

Below you will find the 5 different Portfolios you are asked to complete. Please follow the instructions in each Brief and upload the requested images in the space assigned in each Portfolio.

For each Project you will have upload the Final Image (.jpeg or .png format) and the screenshot of the Project in Photoshop including the layer panel (as shown below). The Final Image is created by using the Export as in the File menu.

It is important that you use multiple layers and groups in your Projects, it is also fundamental you name your layers and groups appropriately with a meaningful name related to what they are. Look at the example above.

To learn a bit more about Layers and the importance of it , please [click here](#).

Please Contact your tutor if you need any help or you have questions on the assignment.
Please look at the Additional Photoshop Lessons, as you can see how to do the assignments.

PORTFOLIO PROJECT 1 – Photo Enhancement

BRIEF

You are tasked with taking a Photograph and enhancing it to a **professional quality**. This project will test your ability of using crop/straighten, adjustments layers, histograms, tonal adjustments, selections, retouching and some content aware tools. You may choose to produce a document **either** for print or for digital devices.

We highly recommend that you use a high quality photograph taken by **yourself**. If you are using a low quality camera, then try taking the photograph in good lighting conditions.

Task – Please ensure all tasks are complete, missing tasks will result in your submission being rejected.	Evidence
Import a digital Photograph into Adobe Photoshop and use at least five applicable editing techniques from the below list: • Crop or Straighten tool • Adjustment layers (Non-Destructive editing) Use at least one of this Adjustments • Image adjustments Menu (Destructive Editing) Use at least one and use it on a copy of the original image • Stamp tool (apply this in a separate layer) • Content Aware tool or Content-Aware move tool • Spot healing Brush tool, Healing Brush tool or Red Eye Tool • Dodge Tool, Blur Tool, Burn Tool or Smudge tool	Final Image Screenshot of Photoshop that shows Layer Panel

TIPS

- Take your Photograph in good lighting conditions, you may also wish to create custom lighting setup
- If you are unsure of anything else or have questions, please contact your eTutor.
- Make sure you are using multiple layers: every time you apply a destructive layer copy the layer and name it with the adjustment you are applying.

Portfolio 1: Insert the Final Image

Portfolio 1: Insert Screenshot of the Photoshop Document including the Layer Panel

PORTFOLIO PROJECT 2 – Mash up

BRIEF

You are tasked with creating a creative, realistic or surreal mashup from a blank Photoshop canvas.

Please click here for a list of ideas for mash up. This project will test your ability of *selection tools*, *moving*, *masks*, *image adjustments*, etc. You may choose to produce it either for print or for digital devices.

We highly recommend that you use a high quality photographs taken by yourself. If you are using a low quality camera try taking the photograph in good lighting conditions.

Task – Please ensure all tasks are complete, missing tasks will result in your submission being rejected.	Evidence
Create a new Photoshop Document using a large image size and place all required images into the new document. Use at least three Photoshop tools outlined in the Design Brief plus any others you deem necessary to create your mashup. Save your document as a Photoshop Document. Please do not flatten your PSD.	Final Image Screenshot of Photoshop that shows Layer Panel

TIPS

- Plan your mashup **carefully**, we are looking to see elements such as realism, humour and awe.
- Take your Photographs in good lighting conditions, you may also wish to create a custom lighting setup
- If you are unsure of anything else or have questions, please contact your eTutor.

Portfolio 2: Insert the Final Image

Portfolio 2: Insert Screenshot of the Photoshop Document including the Layer Panel

PORTFOLIO PROJECT 3 – Vector

BRIEF

You are tasked with creating a Logo from a blank Photoshop canvas. You may choose a logo from the following:

- A sports drinks company
- A game/film studio
- A charity organisation
- An educational organisation

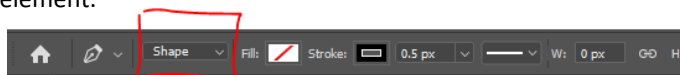

This project will test your ability of Photoshop's Vector tools including shapes, pen (note: use pen tool with shape selected in the option bar) and type. You **must** use a combination of all three techniques in your project.

You may wish to do some research prior to starting for example what logo are you going to base your project on. It could be an imaginary brand or a redesign of an existing IP. However please do not blatantly copy an existing logo. It is also important that your Photoshop document **does not** contain any raster data.

Task – Please ensure all tasks are complete, missing tasks will result in your submission being rejected.	Evidence
Create a new Photoshop Document using a large image size and create your logo using all of the vector tools mentioned in the design brief. Save your document as a Photoshop Document and do not flatten or rasterise any layers	Final Image Screenshot of Photoshop that shows Layer Panel

TIPS

- Use only the vector tools in Photoshop. Pen, Shapes and Type. Make sure you select shape at the top in the option bar for both Shape and pen tool. With path you will draw a Raster element.

- If you are unsure of anything else or have questions, please contact your eTutor.

Portfolio 3: Insert the Final Image

Portfolio 3: Insert Screenshot of the Photoshop Document including the Layer Panel

PORTFOLIO PROJECT 4 – Select and Mask exercise

BRIEF

You are tasked creating a composition using two images, a background image and an image with a subject (Person or Animal). This project will test your ability of using mask and refine your selections. You may choose to produce a document **either** for print or for digital devices.

We highly recommend that you use a high quality photograph taken by **yourself**. If you are using a low quality camera, then try taking the photograph in good lighting conditions.

Task – Please ensure all tasks are complete, missing tasks will result in your submission being rejected.	Evidence
Import two Images, a background and your subject (animal or person) . Use all the tools you have learned in the course, particularly Mask and refine selection to create the composition. Remember to name your layers.	Final Image Screenshot of Photoshop that shows Layer Panel

TIPS

- Take your Photograph in good lighting conditions, you may also wish to create custom lighting setup
- If you are unsure of anything else or have questions, please contact your eTutor.

Portfolio 4: Insert the Final Image

Portfolio 4: Insert Screenshot of the Photoshop Document including the Layer Pan

Portfolio PROJECT 5 – Magazine/Book Front Cover or Poster

BRIEF

You are tasked with the creation of either a magazine front cover, a book front cover or a Poster. You may choose to produce it **either** for print or for digital devices (CMYK or RGB).

We recommend that you research into existing works of others to get an idea of the quality to aim for.

Task – Please ensure all tasks are complete, missing tasks will result in your submission being rejected.	Evidence
In Photoshop, you are required to create a magazine front cover, front book cover or a Poster using all of the tools learnt throughout the course plus any additional tools you deem applicable. Format of the Cover should be Portrait. You must use at least the following tools: Layers, masks, image adjustment layers, type and layer effects.	Final Image Screenshot of Photoshop that shows Layer Panel

TIPS

- Use all the tools at your disposal to create your final piece of work
- If you are unsure of anything else or have questions, please contact your eTutor.

Portfolio 5: Insert Screenshot of the Photoshop Document including the Layer Panel
